Subject Index

	Number-Page
Analysis and Analyzers	
Error	2-1
Fault Diagnosis	3-23
Flow Injection	1-1
Frequency Response	2-11
Infrared Detector	2-59
Particle Counting	3-75
Photometric Analyzer	1-69
Thermocouples	1-23; 2-73
Automatic Control Systems	
Fault Diagnosis	2-23
Biomedical and Bioengineering	
Enzyme Electrodes	1-61
Fracture Fixation	2-47
Video Microscopy	1-33
Calibration	
Computer-Assisted	1-39
Chemical and Petroleum	
Boiler Diagnostics	2-83
Flowmeter Prover	3-83
Interlock and Alarm System	1-47
Pipeline Pressure Relief Valves	3-13
Computers	
Controller for Factory Automation	3-43
Digital Telemetry	4-45
Distributed Control	3-53
In Calibration	1-39
PNET:LAN	3-29
Tagged Telemetry Data	4-49
Controllers	
In Factory Automation	3-43
Programmable Controllers in Maintenance	2-21
Energy Conservation	
Boiler Diagnostics	2-83
Design	4-17
Excess Power Demand Controls	1-53
Powerhouse System	4-63
Power Model, Steam Plant	4-1
Sootblowing	4-41

Angularity Sensors	4-33
Ultrasonic Flowmeters	2-53
Marine Sciences	
Seabed Mapping	3-65
Measurement and Control	
Ciliary Beat Frequency	1-33
Control Center Standards	3-1
Distributed Control Architecture	3-53
Distributed Control for Boiler Efficiency	4-41
Dynamic Gas Temperatures	2-73
Heat Transfer Errors	2-1
Power Model for Control Techniques	4-1
Pressure in Combustion Engines	2-35
Process Recorder	3-7
Slurry Levels and Densities	4-55
Thermocouples	1-23; 2-73
Ultrasonic Flowmeters	2-53
Uncertainty	1-75
Velocities and Turbulence in Heated Flows	2-69
Microprocessors	
Factory Automation	3-43
Fault Diagnosis	3-23
Flowmeter Prover	3-83
Process Recorder	3-7
Seabed Mapping	3-65
Mining and Metallurgy	
Dynamic Simulation	1-11
Programmable Control System	2-21
Reducing Production Costs	1-53
Power	
Energy Management Systems (See also "Energy Conservation")	4-17
Reducing Production Costs	1-53

Filtration Control	3-75

Title Index

Number 1 **Page**

The Potential of Flow Injection Techniques for On-Stream Process Applications 1
Dynamic Simulation of Grinding Circuit Control 11
Thermocouples and Thermocouple Circuits: Gradient Effects and Graphical Analysis Using the Absolute Thermoelectric Power 23
Measurement of Ciliary Beat Frequency Using High-Speed Video Microscopy 33
A Computer-Assisted Calibration System for Process Instrumentation 39
A Highly Reliable Computer-Based Interlock and Alarm System 47
Reducing Production Costs Through Excess Power Demand Controls 53
Amperometric and Potentiometric Enzyme Electrodes 61
Photometric Analyzer Systems for Monitoring Low Levels of Hydrogen Sulfide 69
Measurement Uncertainty: A Standard Methodology 75

Number 2 **Page**

Thin-Skin Technique Heat-Transfer Measurement Errors Due to Heat Conduction into Thermocouple Wires 1
The Infinite Line Pressure Probe 11
The Role of Maintenance in Designing a Plant Programmable Control System 21
State-of-the-Art Pressure Measurements in Combustion Engines 35
Fracture Fixation by Using Vibration Absorbers 47
Active Ultrasonic Cross-Correlation Flowmeters for Mixed-Phase Pipe Flows 53
An Open-Path Infrared Hydrocarbon Detector 59
A Simple Approach to the Compensation of Constant Temperature Hot-Wire Anemometers for Fluid Temperature Fluctuations 69
Dynamic Gas Temperature Measurement System 73
Baseline Data for Boiler Diagnostic Systems 83

Title Index (Cont'd)

Number 3 **Page**

Control Center Standards or Recommended Practices 1
The Latest Industrial Process Recorder Based on Microprocessor and Optical x/t Sensor Technologies 7
Pipeline Pressure Relief Valves 13
Fault Diagnosis in Nonlinear Electromechanical Systems by Continuous Time Parameter Estimation 23
PNET: A Process Local Area Network 29
A Generalized Controller for Factory Automation 43
User-Configurable Fault-Tolerant Architecture for a Distributed Control System 53
High Resolution Seabed Mapping: New Developments 65
On-Line Particle Counting for Filtration Control 75
Liquid Flowmeter Prover 83

Number 4 **Page**

An Incremental Power Model of a MHD/Steam Plant 1
The Study of Reliability in Instrumentation 7
The Design of Industrial Energy Management Systems: Some Interesting Case Histories 17
Stationary Flow Angularity Sensors and the Determination of Angle of Attack in Aerospace Systems 33
Sootblowing Optimization Lowers Total Cost of Recovery Boiler Operation 41
Single-Event Upsets in Spacecraft Digital Systems 45
A Logically Programmable/Nonvolatile Word Selector for Display of Tagged Telemetry Data 49
The Measurement of Aerated Slurry Levels and Densities in High Pressure, Stirred, Polymerization Reactors 55
Industrial Powerhouse System Coordination 63
